

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Currently amended) A hollow golf club head, comprising a face portion having an impact surface that impacts a golf ball and is made from a metallic material, and a crown portion, a heel portion, a sole portion, and a toe portion that are adjacent to the face portion,

wherein, in at least two portions from among the crown portion, the heel portion, the sole portion, and the toe portion, at least one material of dissimilar metallic material that differ differs from the metallic material and a fiber reinforced plastic material is used in regions along edges that are adjacent to the face portion, within a range of 30 mm from the adjacent edges[[.]].

wherein said at least two portions from among the crown portion, the heel portion, the sole portion, and the toe portion are divided into two portions along the edges that are adjacent to the face portion, in regions within a range of 30 mm from the adjacent edges, each of said at least two portions having a first member that extends to the face portion and a second member as a portion other than the first member, and joining portions are formed by joining members made from a fiber reinforced plastic material, each joining member joining the first member and the second member of each of said at least two portions, said first members not overlapping said second members.

2-5. (Cancelled).

6. (Currently Amended) The hollow golf club head according to claim 1, wherein the dissimilar metallic material is an alloy material selected from the group consisting of titanium alloy, magnesium alloy, stainless steel alloy, and aluminum alloy.

7. (Withdrawn) The hollow golf club head according to claim 1, wherein an elastic modulus of fibers of the fiber reinforced plastic material is less than  $27 \times 10^3$  kg-f/mm<sup>2</sup>.

8. (Currently amended) The hollow golf club head according to claim [[2]]1, wherein a thickness  $t_1$  of the first member which ~~joins to~~ is joined by the joining member ranges from 0.5 to 2.0mm, and [[the]] a thickness  $t_2$  of the joining member which joins to the second member ranges from 0.5 to 1.5mm.

9. (Currently amended) The hollow golf club head according to claim [[2]]1, wherein the first member and the second member respectively ~~joint are~~ joined to the joining member [[by]] with an adhesive.
